

# HRS216PKU

Featuring many of the Honda technologies that users know and love, the HRS216 Side Chute Lawnmower has a great price tag and is perfect for the residential user.

## INTRODUCTION

### HASSLE-FREE

---

The HRS216 Side Chute Lawnmower is built tough to last in any domestic setting. Featuring a durable steel 21-inch cutting deck, which is robust enough to handle any hazards you might encounter in your yard.

---

With six cutting heights available, there's a height setting for every suburban backyard. And the HRS216 features ball-bearings in the rear wheels, ensuring you can easily manoeuvre it around your lawn.

---

Furthermore, it's lightweight, meaning if you need to transport it you'll be able to quickly and easily lift it in and out of your car.

---

### SAFETY MATTERS

---

As a leader, Honda looks beyond government regulations, studying real world situations to develop new safety technologies for everyone. Honda has a long record of industry leadership in the development and application of advanced safety technology, and the HRS216 is no exception.

---

An added safety feature of the HRS216 is Honda's Engine Brake technology, which allows for the engine and the rotating blades in the mower to stop within three seconds of releasing the handle.

---

Designed with the operator and passers-by in mind, this Mow-Safe technology reduces the risk of injury to all in the vicinity.

---

## DISTINCTION IN DESIGN

---

What makes the HRS216 stand out from the crowd is its distinctive side chute design. It allows your grass clippings to be returned and rejuvenated straight back into the soil, meaning your yard will look picture perfect all year long.

---

What's more, the side chute removes the need for you to use a catcher bag. This design feature streamlines the mowing process, meaning that you'll spend less time emptying the catcher bag and more time relaxing with your feet up.

---

Of course, by returning the nutrient-rich grass clippings into the soil, your yard will remain healthy. When you look out your window onto a beautiful lawn, you'll be happy you chose a Honda.

---

## POWERED BY THE BEST

---

The HRS216 is powered by the all-conquering Honda four-stroke GCV160 overhead cam engine. This is the same engine that powers many of Honda's other acclaimed lawnmowers.

---

The premium residential engine is the lightest in its class, and incorporates Honda's Advanced Four-Stroke Technology in its design. It means the HRS216 will run powerfully and quietly, with minimal fuel consumption.

---

Of course, like all other Honda Power Equipment products, the HRS216 runs on regular unleaded petrol – the same as your car – so you're sure to save big bucks on all that two-stroke oil!

---

## SPECS

### SPECIFICATIONS

---

<b>PRODUCT CODE</b>	HRS216PKU
---------------------	-----------

---

<b>MOW SAFE TECHNOLOGY</b>	Engine Brake
