

SOME COMPARISONS TO CONSIDER

- **ALWAYS FRESH (NO BOAT ODOUR).** This boat uses 'sealed construction' method meaning no water can migrate from one area of the boat to another (a common problem on other mass produced catamarans which results in water trapped in bilges which leads to 'that' smell) .
- **CLEAN BATHROOMS & NO ALLERGIES.** Bathrooms are one piece with flowing contours and no exposed plumbing and thus easily washed and wiped out rather than the infinite nooks, crannies and cracks you will find on many other catamarans that trap dirt and mould often leading to health issues.
- **INTEGRATED CONSTRUCTION = FEWER PARTS** which means no rattling, creaking, groaning and banging when sailing; which also equals less maintenance.
- **LIGHTER FASTER SAILING AND EASIER DOCKING** - 2.5 tonnes lighter than 'mass produced' catamaran of similar size.
- **BROAD ERGONOMIC TRANSOMS** with thoughtfully positioned railing makes it easy to step onto and around transom compared to the number of small awkward steps and railings on many mass produced Catamarans.
- **MINIMISED THROUGH DECK FASTENINGS** prevents the usual leaks you get with mass produced catamarans. Stauchen bases are moulded onto deck rather than bolted onto or into deck.
- **EASY CLEAN AND INSPECTION.** A philosophy of 'no-pain-drains' that allow easy access, inspection and cleaning.
- **FLUSH MOUNTED FLAT TRAMPOLINE** rather than sagging mesh tramp. More comfortable to walk on and safer while at sea.
- **ACCESS SHALLOWER ANCHORAGES.** Spirited 380 draws 0.5m rather than 1.4m by comparison to a Lagoon of similar size.
